## Women's Initial Gowns, \$1

Women's Fine Quality Long Cloth Gowns, made the slipover style, with kimono sleeves, trimmed effectively with Val. lace, finished in front with Mederia embroidery initial, any letter you may want; special at . . . **\$1.00**

This Store Will Close Thanksgiving Day at 1 P. M.

**Miller & Rhoads**

## RESIGNS PLACE AS CITY DOCTOR

District Physician McCarthy Retires—Joint Session of City Council Called.

Dr. Edward S. McCarthy, district physician to the poor of the city for the sixth district, forwarded his resignation yesterday to City Clerk Ben T. August, to take effect on November 26, or as soon thereafter as possible. Mr. August notified President Robert Whittey, of the Board of Aldermen, who has called a joint session of the Board and the Common Council for the first Monday night in December at 7:30 o'clock, just preceding the regular monthly meeting of the Common Council, to act on Dr. McCarthy's resignation, and if the way be clear to elect his successor. There are at present seven district physicians to the poor in the city, each of whom has a distinct district. They are paid \$600 each, and the city provides a free telephone. A resolution is now pending to increase the compensation to \$1,200. Each of the district physicians also has his own private practice, and only engages to respond to certain calls from the poor of the city without charge.

## KILLED HIMSELF WHILE HUNTING

J. Samuel Parrish, Jr., Accidentally Shot as He Was Preparing for Lunch.

## FRIEND SENDS IN THE NEWS

Coroner's Jury, After Hearing Boy's Companion, Returns Verdict of Accident.

While out hunting yesterday morning, J. Saml Parrish, Jr., seventeen years old, accidentally shot and killed himself near Stop 18, on the Seven Pines car line, in Henrico county. A full charge of shot entered his left breast in the region of the heart, and death was almost instantaneous. Exactly how the accident happened probably will never be known. Even Arthur Godsey, who accompanied the young man on the expedition, could tell nothing except that he heard the report and saw the boy fall. In a moment he was dead. The accident happened at about 11:30 o'clock.

Companion Notices Coroner. Young Parrish left his home at 9 o'clock, and none of the family knew that he was going hunting or that he would be accompanied by Godsey. Acting Coroner J. Fulmer Bright was at the county jail when the news was telephoned in by Godsey, and reached the scene of the tragedy before the body was cold. He immediately impounded a jury, and the coroner's inquest was held yesterday afternoon. His story was straightforward. They had carried their lunch in a bucket, he said, and he was picking up some sticks with which to kindle a fire.

The last he saw of Parrish alive he seemed to be in the act of laying down his gun preparatory to helping with the meal. There was a loud report, and Parrish fell. His companion ran to him immediately, but he gave one gasp and was dead. Godsey then notified the officers of the county and city and waited by the body until the arrival of Dr. Bright.

Trigger Too Delicate. Godsey repeated his story to the jury, and the verdict was that it was accidental. Examination of the body showed that the reason was so close as to burn the clothes. In the hole that was bored directly under the heart, Dr. Bright found one of the wads, indicating that the muzzle of the gun was practically against Parrish's breast when exploded. A test of the gun was made in the presence of the jury, and the trigger was so delicate as to be dangerous. The theory is that in hunting Parrish had kept his gun cocked, and falling to let down the hammers as he laid it down the trigger caught in a twig and caused the death. He and Godsey were close friends, and had hunted together frequently.

Immediately after the coroner's jury adjourned the body was removed to the home of his father, J. Samuel Parrish, 2914 Stuart Avenue. Arrangements for the funeral will be announced later.

## WATSON TO GRAND JURY

Boards Is Charged With Shooting at Mrs. M. J. Boze. Several hours after he had fired at Mrs. M. J. Boze, a woman of 29 North Second Street, with whom he had boarded for the last twelve months, M. F. Watson was caught, and taken to the police station. He was held for the grand jury on a felony charge.

Watson fired at Mrs. Boze as she was seated at the supper table. She had her hand raised to her mouth to drink a cup of coffee, and the bullet passed under her arm, and through the chair, under the wall behind her.

No reason for the shooting could be assigned, except that Watson appeared to have been drinking.

Watson Goes Free. Clarence Wyatt, charged with torturing a horse, was dismissed in Police Court yesterday morning. James Mayo, his driver, was fined \$10.

Warning to Trespassers Drove Birds from Island.

The second lecture of the Thomas lecture course was given last evening in the chapel of Richmond College, on the subject of bird migration, before a large audience as could be seen by the pictures. The lecturer, Frank Chapman, explained how in this latitude birds are migrating northward from February to June, and southward from July to December, so that our bird life is continually changing. In migration the birds do not follow the shortest route, often they actually fly northward in their journey northward.

Often times the course which a given species follows is very narrow, but the golden plover presents a peculiarly interesting case, for it migrates from its Arctic home to Labrador, and then by a continuous flight to Northern South America, and thence to Argentina. But on its return it does not pass through Labrador, going up the Mississippi River.

The popular idea that the seasonal temperature changes prompt the migrations of the birds, seems to be quite erroneous. For the pelicans of Florida migrate in November—not to a warmer climate, but to a place for nesting. Through the ages all of the pelicans of Florida have been migrating annually to an island called Pelican Island.

So that the migration is doubtless due to some physiological prompting. The migration of the birds from one hemisphere to the other is probably connected with the secular changes of temperature. Before the glacial period of the earth's history, called the Tertiary Period, many birds lived near the Arctic Circle. The glaciers of the

glacial period drove them to what are now tropical or subtropical regions. But as the glaciers melted, the birds have gone steadily northward, as the bobolink is seen to be advancing into the wheat fields of British Columbia, where it has never before been found. But each winter brings a glacial climate, and the birds retreat over the paths which they used in coming.

Thus the bird migrations and the strange bird paths seem to have originated.

Mr. Chapman showed many exceedingly interesting pictures of the pelicans on Pelican Island, showing the most intimate habits of fourteen pelicans catch alive from twelve to fourteen inches long, and showing the bird's height, a pad of fat and feathers being placed on the breast evidently to break the fall. Young pelicans eat the fish from the bill of the parent, the fish being regurgitated for the purpose. But the parents do not always select fish of just the appropriate size for their offspring; hence pictures were shown where the head of the fish protruded from the young pelican's mouth while the tail was being properly disposed of.

It is perhaps not wonder that pictures could be shown displaying the stupor of the young pelicans after such gluttonous feasting. But it was remarkable that among thousands of young birds clamoring to be fed, the nesting birds could select their own proper offspring. In one case a young pelican larger and heavier than its parent was shown with its head far down its parent's throat "choking."

To prevent the destruction of the birds of Pelican Island, Mr. Chapman tried to purchase it, but was unable to do so, appealing to Mr. Roosevelt, then president. Pelican Island was then a game reservation, and a warden appointed. A large sign was posted warning off trespassers. Evidently the birds understood this as applying to them, for the next year not a bird arrived.

The sign has now been removed and the birds reign supreme. The concluding lecture of the series will be given this evening, the subject being "Island Bird Life," with particular reference to the nesting habits of the pelicans. The lecture will be very fully illustrated. All bird lovers are cordially invited to be present.

Mr. J. E. Huggins, Field Manager of the Sheldon School, is in the city and during the next few days will meet bankers, insurance and other business men desiring to be informed regarding the Sheldon courses on the "Science of Business Building" and the "Science of Service." Mr. Huggins will fill as many engagements as limited time will permit. Phone or write.

## Post-Office Hours for Thursday

Executive division will be open from 8 to 10 A. M. Money order division will be closed all day. Registry division will be open from 8 to 10 A. M. General delivery will be open from 8 to 10 A. M. Carriers' window will be open from 8 to 10 A. M. Carriers will make deliveries as follows: The morning and five-trip carriers will make one delivery, beginning at 9 A. M. at the main office, and at 9:30 A. M. at the station office. The two-trip carriers will make one delivery, beginning at 9 A. M. Regular holiday collection by Mr. Glendist. Stations—Unless expressly otherwise stated, stations will observe the following hours: Main office, 8 A. M. to 5 P. M.; "B," 8 A. M. to 5 P. M.; "C," 8 A. M. to 5 P. M.; "D," 8 A. M. to 5 P. M.

## WORKED FEMALES OVER TEN HOURS

Officers of Two Concerns Arrested on That Charge by Labor Bureau.

On a warrant sworn out by J. B. Clinedinst, agent for the State Labor Bureau, C. E. Johnson, vice-president of the Gordon Cigar and Cigarette Company, Incorporated, was arrested yesterday afternoon on a charge of working females more than ten hours in any one day of twenty-four hours.

A. G. Jones, secretary and treasurer of the Duplex Envelope and Printing Company, Incorporated, was arrested on a like charge, which was also sworn out by Mr. Clinedinst. Both men were held by Squire J. W. Griggs for their appearance in Police Court this morning. The warrants were executed by Captain McMahon.

The State law prohibits firms working any female employee more than ten hours in any one day, and several companies have thought to evade the law by averaging in a week the ten-hour law, but the statute is explicit and makes no mention of averages. Mr. Clinedinst has been traveling over the State working up cases alleged to be in violation of the law, and started his work in Richmond on Monday.

Under statute violation is deemed a misdemeanor, and is punishable by a fine of not less than \$100, and by imprisonment for not more than six months. Children under fourteen years of age are comprehended in the statute.

## APPELLATE COURT UPHOLDS STATUTE

Appeal Refused in Pinner's Point Case—Supreme Court Proceedings.

In a case from Norfolk county involving the constitutionality of the general law governing the incorporation of towns, the Supreme Court of Appeals yesterday refused an appeal. This case was that of the Board of Supervisors of Norfolk county, Charles F. Pinner and John S. Wright, Jr., against Joseph T. Duke and others. Mann & Tyler represented Harper, while R. H. Bagby, John W. Happer and George G. Martin were counsel for the Board of Supervisors.

Recently the town of Pinner's Point was incorporated. The State has objection to this from the county officials, and in the petition for an appeal the constitutionality of the law was attacked. It was argued that the law would delegate to the Circuit Court legislative functions contrary to the intent of the Constitution.

A writ of habeas corpus was allowed in the case of the Scottish Union Insurance Company against the Virginia Shirt Company. The latter concern had a loss by fire at Fredericksburg, being insured in several companies. The jury in the lower court gave a verdict for the shirt company to the amount of \$174,000.

The claim in this case is that the provisions of the Iron sale clause were not complied with.

Day's Business. Yesterday's proceedings in the court were as follows:

Norfolk and Western Railway Company vs. Stone. Fully argued by R. W. Withers and E. E. Holland for the defendant in error, and submitted.

H. S. Watkins & Co., et al., vs. Camp Manufacturing Company. Partly argued by Ernest S. Patton and the plaintiffs in error, and by J. C. Parker for the defendant in error, and continued to-day.

Next cases to be called: Mercer vs. Southern Atlantic Life Insurance Company; County of Mocklenburg, by, et al., vs. Beale et al.; City of Richmond vs. Model Steam Laundry; Aspegren & Co. vs. Wallerstein Produce Company; Richardson vs. J. S. Hoskins Lumber Company; Lambert vs. Jenkins; Talley vs. Metropolitan Life Insurance Company; and Southern Railway Company vs. Stetterfield's administratrix, being Nos. 12 to 20 on argument docket.

Bolton Dismissed. A. T. Bolton, who had been charged with betrayal, and who was subpoenaed by the State, was dismissed in the Hustings Court yesterday morning. He was married Monday night.

High School Singers Get Aviation Tickets

Pupils of the public schools below the high school, who will be admitted free at the aviation meet to-day. High school pupils will be admitted free by ticket on Friday, and tickets will be distributed to members of the High School Chorus at the City Auditorium this afternoon after President Taft's speech.

## NO EXTRA SESSION OF LEGISLATURE

Governor Has No Intention of Calling Meeting on Primary Question.

## PAMUNKKEYS PAY TRIBUTE

Indians Contribute to President's Dinner—Keeping Tab on Locusts.

Governor Mann said yesterday that he had no intention whatever of calling an extra session of the Legislature, to pass on the primary or any other question. It was stated that a demand had been made on Governor by a Norfolk newspaper that he call a session to legalize primary elections in Virginia. This course was suggested in view of the recent decision of Judge Hinkley in that city, under which appears that the section of the Code which was supposed to protect such elections is defective.

"The same Legislature which would hold the extra session," said the Governor, "met last winter and had before it several propositions for the legalization of primaries, all of which it turned down, or at least failed to vote upon. Is there any reason to suppose that the same people would take any other action at a special session?"

"The people may if they wish make the question an issue in the primaries of next year," said the Governor, "but I don't propose to call an extraordinary session."

## INDIANS PAY TRIBUTE

Chief Cook Brings Game to Governor for President.

Chief G. M. Cook, of the Pamunkey Indians, paid the annual tribute to the Governor yesterday. Chief Cook came earlier than usual this year. He had heard that the Great White Father from Washington would be in Richmond to-day, and he and his council thought it appropriate that the tribute of game should be ready in time for the table to be spread in honor of the President by the Governor.

"The Great Spirit," he said, "told me I should bring tribute to-day, so that the Great Father may know that there is peace between him and his Indian subjects."

From time immemorial the Pamunkeys have paid their annual dues to the Governor of Virginia. Chief Cook has performed this duty in person for many years. This time several brace of mallard ducks and a couple of dozen quail were in the offering. A present was also brought for Secretary R. C. Stearnes, of the State Board of Education, in grateful recognition for what the State is doing to educate the Pamunkeys.

## EXPECT LOCUSTS

Movements of Virginia Broods of Pest Will Be Traced.

In the forthcoming annual report of the Department of Agriculture, the movements of the locusts will be traced so that the farmers of the State may know where to expect visitations next year. There are many broods of these pests, and much work is necessary to forecast their appearance. In some cases they overlap. There are a few broods in Virginia of the thirteen-year variety, although most of them are of the annual variety. Sometimes they fail to materialize at all, or are delayed a year.

The United States Department of Agriculture recommends that in sections where locusts are expected it is inadvisable to plant fruit trees, as they puncture the young plants. However, the Virginia department does not officially endorse this advice.

Gettysburg List Complete.

Colonel V. V. Ridgout, Secretary of the Virginia Military Records, has prepared his final list of commands and commanders in the Gettysburg campaign. It will be published in the Times-Dispatch next Sunday for the first time. The list is in connection with the matter will be turned over to Colonel T. T. Smith, secretary of the commission, for the final determination of that body.

This work is not official with Colonel Ridgout, but was undertaken by him voluntarily at the request of the commission.

Officers Elected.

The Adjutant-General was notified yesterday that Second Lieutenant George W. Burns, of the Third Company of Coast Artillery, of Portsmouth, had been elected first lieutenant, and that Ben B. Britt had been elected second lieutenant to succeed Lieutenant Burns.

REASONS FOR SUIT

Lyons Files Bill of Particulars Against Miller & Co.

The case of Thomas J. Lyons against Rosenberg Brothers & Co., set for trial yesterday in the City Circuit Court, was dismissed from the docket on motion of the plaintiff's attorney. It is understood that a settlement was reached in the case.

Heath J. Rives qualified to practice law in the City Circuit Court.

In the case of John H. Lyons against Miller & Co., the plaintiff filed the bill of particulars of his claim. The suit grows out of the difference in the quantity of certain goods which Mr. Lyons claims the brokerage firm sold for him without orders, or at a sale other than the point at which a sale was authorized.

Attachments were dismissed in the City Circuit Court on motion of the plaintiff's attorney in the cases of Lyons vs. McBrayer against J. H. Monroe and O. K. Gregory Company against Oscar Burnett.

Reception to Bible Class.

The large men's Bible class taught by O. S. Morton in Centenary Methodist Church held a reception in the parlors of the Central Y. M. C. A. last night. Burnett Lewis presided, and a number of speeches were made. A musical program was rendered under direction of J. M. Culbreth and Fred Hardy. Soloists were Miss Catherine Thurston and E. H. Clowes.

## BOLTON AND JONES ADMIT MORE ERRORS

Health Officer Levy Says City Engineer Has No Authority to Abate Nuisances Without Awaiting Meeting of Street Committee or Council.

Witness after witness—contractors, members of the city government and those connected with the City Engineer's office in one capacity or another—were called before the subcommittee on streets last night for the purpose of getting at the bottom of things in the City Engineer's department. The committee adjourned before anything of sensational or very pertinent nature was brought before it. Several discrepancies were shown in one place or another, but generally speaking no new developments were disclosed. Practically the only telling point scored against the engineer's department was that made by Councilman E. Price Davis, of Clay Ward, who showed that in furnishing information concerning a sewer on Strawberry and Cary Streets, Assistant Engineer Bolton had been wrong.

In his testimony Mr. Davis said that he had appeared before the Street Committee asking that a connection be made from Engine House No. 12 to the sewer. Mr. Bolton stated that it was too shallow for such a connection, and his statement was verified by Mr. Bolton. Mr. Davis said that he had been informed that the sewer was at least six feet deep. At all events the connection was made.

When the question was put to Mr. Bolton last night, he said that to the best of his knowledge the pipe was about two feet deep, and that he felt certain it was not more than three feet deep. Mr. Bolton's statement was verified by Mr. Bolton.

Mr. Bolton said that he had been informed that the sewer was at least six feet deep. At all events the connection was made.
